

MISSA 2010
Supply List for
Photoshop Elements & the Digital Darkroom
With **ALAN THURSTON**

Students will need to have a laptop (preferred) or desktop computer (PC or MAC) with photo editing software, preferably Photoshop Elements or Photoshop. Some simpler editing software may not have all the features that will be used during the course. Students should also bring about 20 high resolution digital images in jpg or jpeg format. These should be “straight from the camera” without any additional enhancements. Students are responsible for downloading these images onto their computer.
